DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

2. Claims 31 and 32 are pending in this application and have been examined.

Terminal Disclaimer

3. The terminal disclaimer filed on 1/7/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any US Patent granted on co-pending US application 10/020,427 has been reviewed and is accepted. The terminal disclaimer has been recorded. The terminal disclaimer overcomes the provisional obviousness type double patenting rejections, found in the previous Office Action in the case, of claims 31 and 32 as being obvious in view of co-pending US application 10/020,427,

Reissue Applications

4. Claims 31 and 32 were previously rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth in the previous Office Action in this application. See 37 CFR 1.175. The substitute declaration filed 1/13/2004 is proper and the rejections of the claims are overcome.

Drawings

5. New corrected drawings are required in this application because the drawings currently found in the case have the number of the now-surrendered US Patent 5,761,301 on them. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

6. Claims 31 and 32 are allowed.

7. The following is an examiner's statement of reasons for allowance:

The features of the claimed invention not found in the prior art are: an optical disc and a method for manufacturing the disc; the disc having a reflective layer formed on an data zone; the data zone having pits indicating signals readable by light radiation; where portions of the reflective layer have been trimmed to form markings forming a bar-code pattern that indicates information; where the markings are formed on a track of the optical disc; and where the pits are provided between successive markings forming the bar-code pattern.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2137

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul E. Callahan whose telephone number is (703) 305-1336.

The examiner can normally be reached on M-F from 9 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Morse, can be reached on (703) 308-4789. The fax phone number for the organization where this application or proceeding is assigned is: (703) 872-9306. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
